

Product Specifications

Product Name: Transparent pro-environment calcium-zinc stabilizers

Product Aspect: white or yellowish powder

Product Model: RT-600C

Product Features:

- 1、 The pro-environment stabilizers own the excellent heat resistance and the thermal stability, and low dosage
- 2.The pro-environment stabilizers own high transparency, and end product will not be mist like
- 3.The pro-environment stabilizers are odorless, and its hydrolysis resistance is very good.
- 4.The pro-environment stabilizers own excellent initial coloring and long-term weathering resistance.
- 5.The pro-environment stabilizers own excellent dynamic processing and widely used.

Recommend Usage:

The pro-environment stabilizers are applied to pro-environment transparent PVC granules, film, plastic toys, medical PVC products.

Versatile formula:

PVC	Plasticizer	RT-600C	Lubricant	Epoxidized soybean oil	Application process
100	25PHR above	0.6~1.5	0.1	2	Injection/Extrusion

Note: 1. According to the processing machine and formulations, and you should change the lubricant system reasonably, and please use the lubricant with a good transparency. In order to make your products have better quality, please pay attention to the choice of lubricant while using our products. If you need, please contact us.

Standard:

According to the third party international speciation, the product conforms RoHS, PAHs(18 items), Phthalates(21 kinds), PFOS/PFOA, NP, BPA, REACH-SVHC.

Product Storing:

Advice to put the product in dry and draft chamber. Please using up asap once package opened

Product Packaging: 25kg / Package (PE intima bag)
